

MIPP slow controls

MIPP collaboration meeting
1 October 2004
Holger Meyer

Overview

- Mostly in good shape
 - Almost all devices are monitored automatically
 - Acnet, iFix
 - Recent progress on LV monitoring
 - Needs to have interspill trigger, DAQ, Onmon
 - Interface to database exists
 - But not running routinely yet

To-Do list

- iFix XMLRPC interface reliability
- JGG ripple
- DAQ-slowcontrol interface
- some Droge HV channels for Emcal
- Software to look at device history, etc.
- ... (not much more)
